# WHAT IS GLOBUS SMART CHAIN?

GlobusChain is an innovative Layer 1 blockchain platform designed to bridge the gap between traditional internet (Web2) and decentralised ecosystems (Web3). The project aims to drive mass adoption of blockchain technology by integrating the best features of both Web2 and Web3 technologies, creating a user-friendly platform offering a wide range of applications and services catering to various industries. GlobusChain's long-term vision is to redefine how people interact with the digital world, providing seamless experiences for users and customers.

**Globus** will ultimately serve as the foundational infrastructure for an open world in digital and real use cases.

**Globus Chain** is an innovative solution to bring programmability and interoperability to Global digital solutions and the economy. Globus Chain relies on a system of PoS consensus that can support short block time and lower fees. The most bonded validator candidates of staking will become validators and produce blocks. The double-sign detection and other slashing logic guarantee security, stability, and chain finality. **Globus will serve the next billion Web3 + Web2 users and** help them experience the full promise of self-custody of their digital assets.

Globus will be an **Ethereum-Virtual Machine (EVM)** compatible blockchain powered by DPOS. Globus is fast, cost-effective, and frictionless. Globus aims for high transaction throughput (from hundreds to thousands of transactions per second), fast transaction finality (5-6 seconds), and nearly zero transaction fee).

Its **Delegated Proof of Stake (DPOS)** consensus mechanism combines decentralization with streamlined, scalable, and environment-friendly transaction processing. The Process speed will be up to **100000 to 200000 Transactions per second**.

Globus can deliver cheaper transactions than most of the other blockchain, making decentralized applications (dApps) and smart contracts potentially more affordable, less carbon intensive, and more user-friendly.

As a **Layer 1 blockchain**, Globus aims to massively scale the Web3 and web 2 user community by providing builders with the ability to instantly port apps and crypto assets from other blockchains while benefiting from nearly zero transaction fees, high throughput, and fast transaction finality.

Key value propositions of Globus include:

### **EVM COMPATIBILITY**

Globus Will be built and bridged with multiple blockchains based on Ethereum Machine, which supports the rapid porting of apps and smart contracts from Ethereum and other EVM-compatible chains.

## SCALABILITY

Globus aims to deliver faster, cheaper, and greener transactions and smart contract execution than proof of work chains.

## INTEROPERABILITY

The Inter Blockchain Communications (IBC) protocol enables interoperability and bridging to other IBC-enabled chains, such as Cosmos Hub, Osmosis, etc

## PROOF OF STAKE (POS)

Utilizing POS as a more streamlined and scalable consensus mechanism while still maintaining security through a range of experienced and carefully-vetted validators.

## OPEN SOURCE

High involvement of the community is welcomed to proactively review and provide suggestions to strengthen Globus.

# ETHEREUM VIRTUAL MACHINE (EVM)

Globus will be powered by Ethermint, which allows rapid porting of smart contracts from Ethereum and EVM compatible chains. Solidity developers who have prior experiences in building on Ethereum or other EVM chains can build decentralised applications on Globus using Solidity.

**Proof of Authority (PoS):** Proof-of-Stake (PoS), as we all know is the till now most secure and it maintains security through a range of experienced and carefully-vetted validator

# CONSENSUS ENGINE

Globus will be based on POS as consensus engine, while having the features of Ethereum at the same time. Globuschain will be a **Layer1 DPOS blockchain system**. In the Globus consensus, other validators vet validators based on their commitment to the Globus ecosystem, technical ability to implement upgrades flawlessly, track record in operating high availability nodes, and economic viability. Among these permissioned validators, the voting power of each node is determined by the staking token amount allocated by the validator group.

# FEE STRUCTURE

Globus will have **nearly zero transaction fee** as we believe in expanding the crypto asset usage in world, so people have more freedom and less fear.

Globus chain will be **very fast and very cost and time effective** thanks to the design architecture and consensus engine. It allows for a higher transaction execution capacity with a lower cost.

Each transaction on Globus consumes gas during execution based on the computational effort needed. **The transaction fee is calculated as the total of gas consumed during transaction execution multiplied by the unit gas price.**

Globus adopts a fee market module with a **dynamic fee structure**. At each block, a common base fee is calculated dynamically for the next block, depending on the whole network utilization.

Specifically, the fee market module has been designed to support **Ethereum's EIP-1559 transaction format** in order to make Globus integration simpler for wallets and decentralized applications.

The module's formula to calculate the base fee at each block is also similar to the formula used by EIP-1559.

This means that transaction fees will increase when the network is congested, and they will decrease when the network has spare capacity. In contrast with EIP-1559, the fee market module implemented on Globus does not burn any of the base fees.

The base fee and priority fee continue to be collected by the validators.

# SECURITY & PERFORMANCE

## INSTANT FINALITY

A typical PoW consensus does not provide fast finality in the sense that blocks could be re-organised to a certain block height given a 51% attack.

The probability of a transaction being revoked goes down as the number of confirmations goes up, so typically users need to wait at least 6 confirmations before their transaction is added to the blockchain.

In Globus instant finality refers to the fact that transactions are finalized once they have been included into a block

# SCALABILITY

Globus can run more transactions per second than a typical PoW chain, as it will be a Layer 1 DPoS blockchain, providing fast finality. The advantage of having higher throughput in the network is that it becomes cheaper to run smart contracts.

As transactions are processed up to **20x faster**, there is less backlog driving up the fees, which in turn helps saving transaction fees. Because of the peg zones and hub design of the Cosmos network, it is possible to scale horizontally by adding a second, third, etc. Ethereum zone, increasing the TPS with each zone that is added.

# SECURITY

We will make sure that we are spot on security and performance criteria, including background check, to ensure they are of highest standards.

On the technical side, validators are expected to comply with a security checklist and follow best practices when running their nodes.

This includes having

- A secure operating data center
- Backup and redundant hardware to ensure high availability and reliability
- Sentry node architecture for DDoS prevention
- Intrusion detection / prevention system installed
- General security checks, including automated patching
- Account security, remote access controls and KMS e.g., HSM o System monitoring and alerting.

# SUSTAINABILITY

In terms of sustainability, PoS networks are generally less energy-intensive than Proof-of-Work networks because validators do not need to solve complex puzzles as in PoW, hence their required processing power is much lower.

Globus Smart Chain was born from the idea of creating an ecosystem where we can create services and products which give a boost to global usage of crypto assets by the crypto community as well as the normal user, also to use blockchain and other future technologies for betterment of humanity and future generations.

Our main **aim is to create a global digital utility** which can be used by masses in daily transactions online as well as in shopping from a local shop but also a whole ecosystem of new services and products which are backed by blockchain technology and foray into other technologies as well.

For this we have to create ecosystem which supports not only platforms related to crypto assets like crypto wallet, crypto exchange, NFT marketplace etc., but also many other areas where block chain solutions can be used in accordance with changing needs of the new world.

Our aim is not to only explore the ecosystem of the crypto related projects but also create unique projects where people can use crypto currencies as mode of payment and make it easy for them to control their own assets Our long-term goal is to make Globus Smart Coin a way of transactions between not only P2P space also B2C and B2B space.

# PROBLEM STATEMENT

There are few Major flaws which are holding back crypto currencies and blockchain to be used as a day to day transaction along with FIAT currencies.

- Power consumption and carbon footprint of crypto mining is still very high.
- The crypto transactions still need longer time compared to the banking transactions.
- Lacking Political and Business will to accept crypto currency as asset class.

- Compared to fiat currencies crypto currencies are not used in most of the online transactions.
- An average person is still lacking full understanding of not only crypto use but also its advantages and how they can be traded like fiat currencies.
- Less money is going in researching the solution of problems crypto currency and block chain is facing.
- Most projects only looking to make quick money but do noting for the future of the technology

# COMPANY DESCRIPTION

## OUR VISION

To become a leading global platform that revolutionizes the digital landscape by seamlessly connecting Web2 and Web3 technologies, fostering a thriving ecosystem for users, developers, and investors.

## OUR MISSION

To create innovative, user-friendly applications and services that bridge the gap between traditional internet and decentralized ecosystems, driving mass adoption of blockchain technology and enabling users to enjoy the best of both worlds.

# SOLUTION

**We** have planned an ecosystem of new solutions which will help users to save their assets as well as trade and use them for different services in the coming years.

**We** will invest in new tech research on blockchain user cases and how we can reinvent the wheel in a way that blockchain can be used in most of the areas of daily life, so it can be used for betterment of humankind

To achieve our Mission and Vision and to provide best of the best to our customers we have planned to develop Ecosystem which includes services like crypto wallet, crypto exchange etc. more over we will also develop apps and products which will use blockchain technology as one of the key parts of development.

To achieve this, **we will be partnering and hiring talented team** of block chain technology geeks who can give us best possible solutions.

# HOW TO BUY GLOBUS SMART COIN (GLSC)?

You can buy **Globus Smart Coin** in Presale from our website by sending us one of the cryptocurrencies which can be swapped with Globus Smart Coin. After the pre-sale ends Globus Smart Coin will also be available on many of the major exchanges after that.

**BNB can be used to buy GLSC**, but in future these major cryptocurrencies which can be used to buy Globus Smart Coin (GLSC). **BNB**, Bitcoin (**BTC**), Ethereum (**ETH**), Tether (**USDT**), USD Coin (**USDC**) and BNB USD (**BUSD**).

# HOW IT WORKS?

You can register on our platform and explore all of the available in a few simple steps. You can make a Meta Mask or Binance Wallet accounts. Once you've decided to create a Wallet, you'll be able to send the paired currency to our wallet and we will issue you the Globus Smart Coins as per the transaction value shown in our presale accordingly.

We ensure that participants get most of the benefits. We will create a robust community and addressing questions and concerns is easy.

Everyone in the community is empowered to help answer questions or concerns on regular a basis. Just follow these simple steps:

## **Make an account in Multi Currency Crypto Wallet**

One can make account in one of the following crypto currency wallets available.

Here are the few of the best multicurrency crypto wallets.

### **Meta Mask Wallet**

(<https://metamask.io/>)

### **Binance Wallet**

(<https://Binance.com>)

### **Trust Wallet**

(<https://trustwallet.com/>)

**Create a Multi-Currency Crypto wallet** account on a desktop computer or a mobile device running IOS or Android. This method will allow you to buy and receive GLOBUS SMART COIN.

### **BNB should be sent to your wallet**

BNB, or any other given Crypto currency can be purchased directly on this wallet or transferred to your Wallet from exchanges such as Coinbase, Binance, and others. Make sure to use when transferring BNB.

### **Change your BNB to GLOBUS SMART COIN**

As soon as you have BNB or any other currency as mentioned above on hand, you can buy GLSC directly from our website <https://globuschain.com>.

# OUR FUTURE PRODUCTS AND ECONOMICS

## GLOUSCHAIN BLOCKCHAIN RE-DEFINED

We will start developing Globus chain will be a futuristic blockchain that will redefine how the blockchain and projects related to blockchain work.

We will strive to make Globus Chain as one of the prominent ways Blockchain will be used in different areas of business and economy as well as social welfare and other major areas of technology.

# MARKET OPPORTUNITIES AND SIZE

GlobusChain targets key industries and applications that present significant growth opportunities. By addressing the challenges and inefficiencies in these markets and integrating Web2 and Web3 technologies, GlobusChain can capture a substantial share of the market value.

## ECOMMERCE

The global e-commerce market is expected to reach **\$6.54 trillion** by 2023. GlobusChain's e-commerce platform will combine the ease of use and accessibility of Web2 with the security and transparency of Web3, attracting both traditional and decentralized e-commerce users.

## GAMING AND NFTS

The gaming industry is projected to be worth \$200 billion by 2023, while the NFT market has seen exponential growth, reaching a market capitalization of over \$40 billion in 2021. GlobusChain's gaming platform will offer a blend of Web2 and Web3 gaming experiences, supporting both centralized and decentralized games, and providing an integrated NFT marketplace.

## CONTENT SHARING & SOCIAL MEDIA

Social media platforms generate billions of dollars in revenue each year, with the global market size projected to reach \$102.62 billion by 2023.

GlobusChain's content sharing and social media platform will seamlessly integrate Web2 and Web3 features, offering users a transparent and equitable online experience that rewards their contributions and interactions.

## DEFI

The DeFi market has grown significantly, with a total value locked (TVL) of over \$80 billion as of September 2021. GlobusChain's DeFi services will make decentralized financial products more accessible to a wider audience, integrating traditional finance (CeFi) components to create a more inclusive financial ecosystem.

# INTERNET OF THINGS (IOT)

The IoT market is projected to reach \$1.1 trillion by 2026. GlobusChain's IoT solutions will leverage blockchain technology to enhance security, privacy, and data management in connected devices and systems.

# SUPPLY CHAIN MANAGEMENT

The global supply chain management market is expected to reach \$37.41 billion by 2027. By incorporating blockchain technology, GlobusChain can provide improved transparency, traceability, and efficiency in supply chain processes.

# THIRD-PARTY APPLICATION

&

# SERVICE INTEGRATION

GlobusChain encourages third-party developers to build innovative applications and services on the platform, fostering a diverse and growing ecosystem. By providing a robust and scalable infrastructure, GlobusChain enables developers to create solutions that seamlessly blend Web2 and Web3 technologies, further driving the mass adoption of blockchain technology.

# GLOBAL ECONOMICS

As One by one all these apps are launched users will be able to use Globus Smart Coin to pay for the products and services.

We will not only create our own ecosystem but also invite other promising platforms and startups to use our ecosystem or to join our ecosystem and blockchain so we can serve the humanity in a better way and create a really futuristic decentralized and free world and world order.

We will keep researching and keep striving for a better future for our future generation not only in the field of Blockchain but also in other areas of Technology.

# RISK CONTROL MANAGEMENT

Our expert team has included a number of sophisticated safeguards to prevent the theft of money or information and provide risk control management.

Define a set of risk management rules to avoid contract and market failure

# WHY CHOOSE US?

As we all know that any company thrives on its Mission and Vision and can only become successful when it gets support of the people who believe in their Mission and Vision.

We have put forward our Vision of future in front of you and we are very passionate to make a difference for current and future generation of humanity.

Our **aim** will be to be able **to provide genuine value to the community** is the first step toward developing a meaningful products and services and, as a result, a successful organisation.

A comprehensive platform for cryptocurrency enthusiasts. According to our research, people prefer to consolidate services for simplicity rather than having too many platforms to achieve their goal of growing funds in the world of Blockchain and crypto/digital currency. We at GLOBUS believe in growing in a very consistent manner and like many innovative platforms.

We are now all set to offer a unique ecosystem for not only our community but also to our valued clients by underpinning all the essential components together.

Our platform will be extremely simple to use, with only the necessary options for users and other stakeholders.

We will launch different platforms where one will be able to use Globus Smart Coin and other top crypto currencies for different services and get a chance to even win the Globus Smart Coin in few platforms.

# GLOBUS ROADMAP

**April-June  
2024**

- Complete full wireframe development and finalize app design.
- Begin development of core platform infrastructure and integration of Web2 and Web3 services.
- Conduct extensive security audits and testing for platform components.
- Launch multiverse NFT project to raise additional funds.

**July-Sept  
2024**

- Launch the beta version of the Globuschain platform for user testing and feedback.
- Implement staking, yield farming, and DeFi services within the platform.
- Establish partnerships with key industry players and third-party service providers.
- Begin marketing campaigns to raise awareness and drive user acquisition.

**Oct-Dec  
2024**

- Official public launch of the Globuschain platform.
- Integration of additional services such as e-commerce, gaming, and content sharing.
- Continuously refine and optimize the platform based on user feedback and analytics.
- Expand community outreach through events, collaborations, and educational content.

**Jan-March  
2025**

- Introduce mobile app versions for iOS and Android devices.
- Focus on user experience and accessibility improvements.
- Explore and integrate innovative solutions such as Layer 2 scaling technologies.
- Launch a developer program to encourage third-party app development within the ecosystem.

**April- June  
2025**

- **Develop and launch the Globuschain platform's governance module, allowing GLSC Token holders to participate in decision-making processes.**
- **Expand the platform's global reach by targeting new markets and supporting additional languages.**
- **Strengthen the platform's security and privacy features, ensuring user data protection and compliance with evolving regulations.**
- **Foster growth of the NFT and gaming ecosystem within the platform by collaborating with artists, developers, and gaming studios.**

**July-Sept  
2025**

- **Continuously monitor and improve platform performance, scalability, and user experience based on community feedback.**
- **Develop and launch advanced DeFi features, such as cross-chain bridges, lending/borrowing services, and derivatives trading.**

**Oct-Dec  
2025**

- Implement integration with hardware wallet providers (Ledger/Trezor) for enhanced security of user assets.
- Grow the platform's brand through marketing initiatives, strategic partnerships, and community engagement.

**2026**

**To Be Continue..**

# TEAM

We are a team of highly motivated and passionate Entrepreneurs and Engineers who are looking to make a difference in the New Era of Technological Innovation.

We all believe in the fact that as the computing power of new processors and servers keep increasing the future of most digital work lies in blockchain which will free the normal person from day to day sufferings.

Our aim is to make world a better place and a global village where people will no more have boundaries which are dictated by societies, race, language , religion, borders or prejudice.

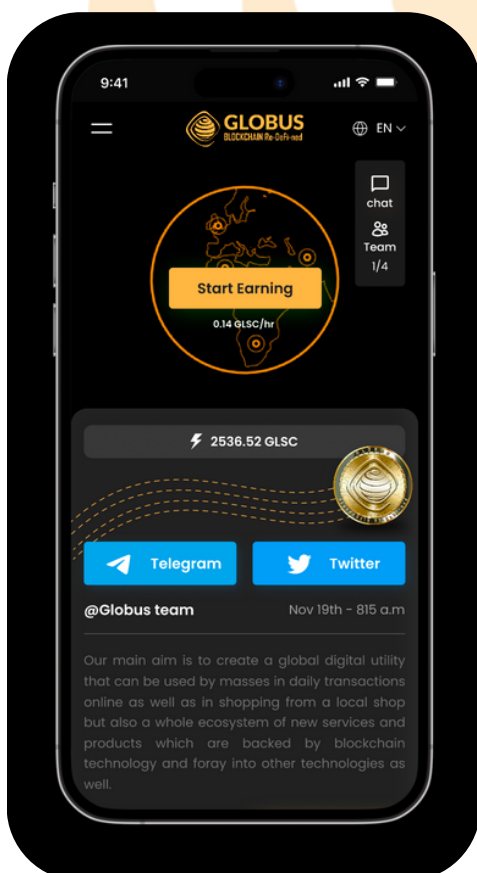

As we have seen recently how world have been rattled by covid and wars and brought havoc on people due to their money tied up to banks and institutions which were unable to serve their purpose at the right time when needed the most.

# APPS IN THE DEVELOPMENT PROCESS

## GLSC EARNING APP

- The Globuschain earning app is designed to be easy to use and accessible to everyone, regardless of their experience with cryptocurrency
- Earn GLSC by participating in the network, including tasks like inviting friends to connect and earn GLSC
- The more you participate, the more GLSC you can earn, and you can move your GLSC coins to the Globus Wallet after achieving a certain goal and participation level
- Key features include: security through cutting-edge encryption and other measures and flexibility in earning GLSC through a variety of methods
- Download the app when it is launched to start building your wealth and making a difference in the world of cryptocurrency and digital assets.

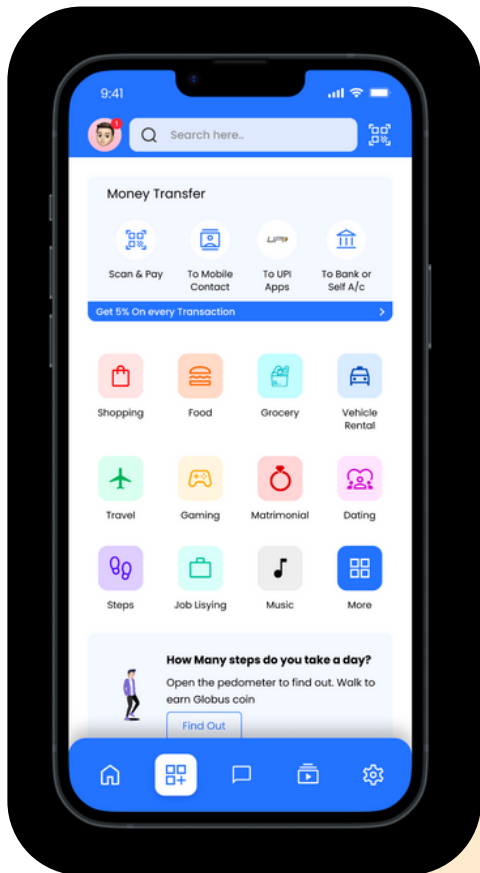

# APPS IN THE DEVELOPMENT PROCESS

## **SUPER APP**

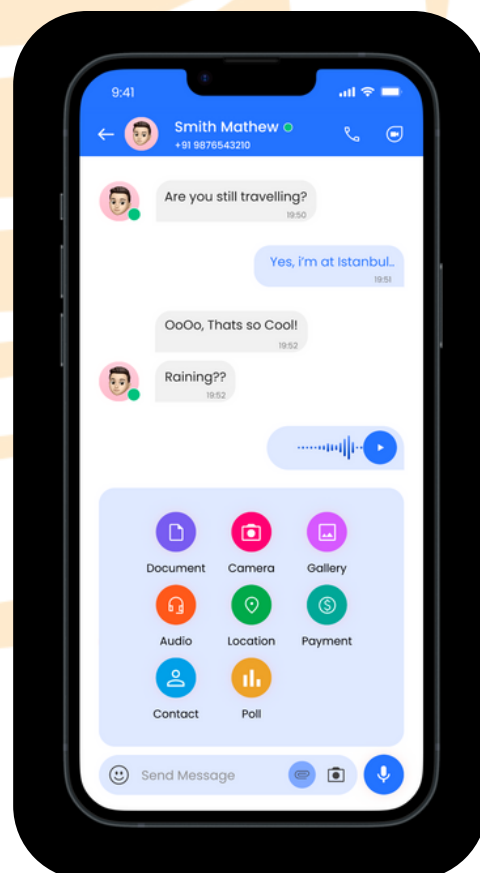

- Introducing Globus, the ultimate super app that will change the way you use your phone
- All-in-one app providing a wide range of services like messaging and social networking and media to shopping, food ordering taxi hailing ,payments and much much more.
- Easily stay in touch with friends and family through instant messaging, voice calls, video chats, share photos and videos
- Follow your favorite celebrities, influencers and brands and stay updated on the latest news and trends.
- Seamless shopping experience, purchase products from favorite stores and brands directly from the app, built-in payment system for quick transactions

# APPS IN THE DEVELOPMENT PROCESS

- Other services include booking reservations, ordering food delivery and more, with intuitive and user-friendly interface
- App makes use of web3 payment system, GLSC coins can be used to get discounts and offers only available for GLSC Investors and traders.
- Convenience and efficiency, no need to juggle multiple apps. Download now and experience the future of mobile app

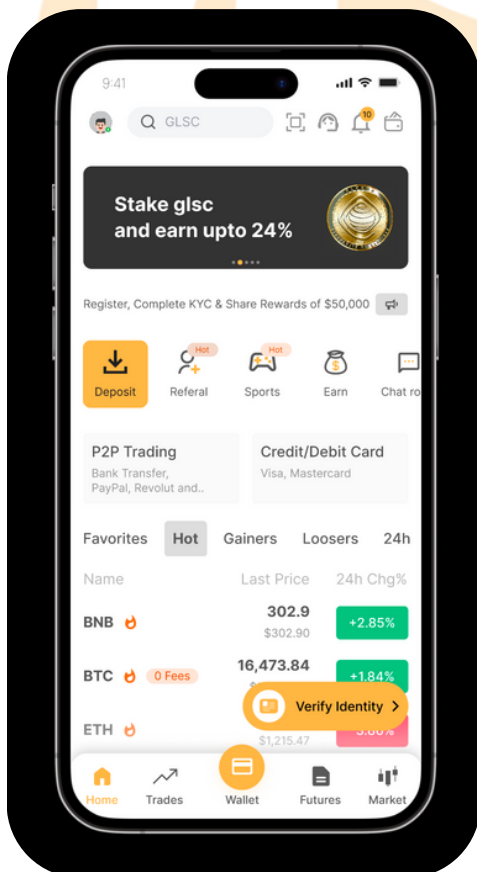

# APPS IN THE DEVELOPMENT PROCESS

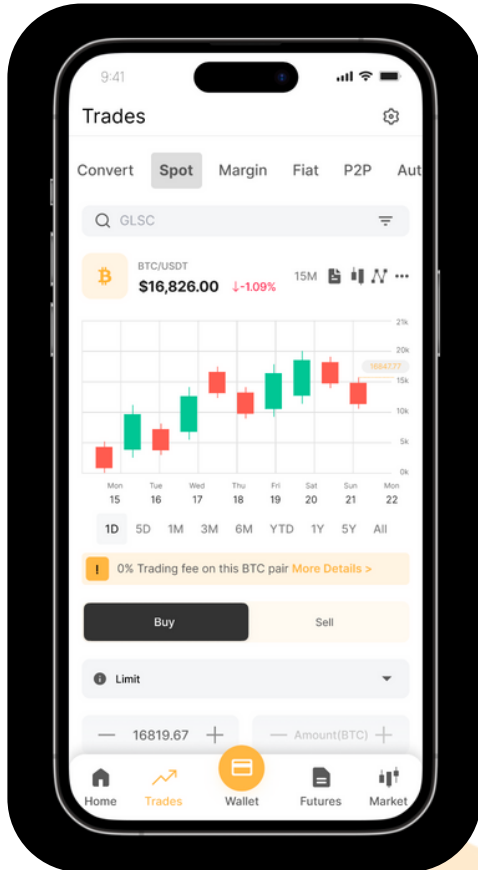

## WEB3 SUPER APP

- Introducing Web3SuperApp, an all-in-one super app based on web3 services that provides users with all the services currently offered by prominent Cryptocurrency companies and more
- Web3SuperApp built on latest web3 technology for secure and decentralized transactions
- Wide range of features to meet the needs of novice and experienced traders, including buying, selling, and managing digital assets, advanced charting tools, and web3-based services like DeFi and NFT trading

# APPS IN THE DEVELOPMENT PROCESS

- **Built-in wallet for secure and decentralized storage and management of digital assets, access to dApps and smart contract interactions**
- **Security is a top priority, with cutting-edge encryption and two-factor authentication**
- **Constantly working to improve and offer new features, with a dedicated team of experts providing the best web3-based experience possible**
- **Download Web3SuperApp when it is launched and take control of your digital assets and start building your wealth.**

# COIN/TOKEN DETAILS

Total of  
1 quadrillion (1,000,000,000,000,000)  
Globus Smart Coins will be minted through Smart contract and deployed through Binance Smart Chain . We will be selling 20% of the tokens in presale which will be done in 5 phases which will run max for 120 days . If the Pre-Sale phases goals are reached before time, we will start next phase of pre sale within 24 hours. We have kept the investment amount to minimum 0.1 BNB for out presale which will make easy for most of the retail investors to invest.

We will not accept any FIAT currencies during the Pre-Sale as we firmly believe in digital currencies and that's why working on building a ecosystem based on blockchain and crypto assets and crypto currencies.

# COIN/TOKEN USE CASES

## PAYMENTS

GLSC tokens can be utilized for transactions within the GlobusChain ecosystem, allowing users to pay for products, services, and platform fees across Web2 and Web3 environments.

## STAKING:

Users can stake GLSC tokens to earn rewards and access the platform's decentralized finance (DeFi) services, seamlessly integrating traditional finance with decentralized solutions.

## GOVERNANCE

GLSC token holders can participate in the platform's decentralized governance, casting votes on proposals and decisions that influence the future of the ecosystem and incorporate both Web2 and Web3 perspectives.

## INCENTIVES

GLSC tokens will be employed to motivate users, developers, and other participants, fostering growth and adoption of the platform across various services and applications that leverage Web2 and Web3 technologies.

# VALUE ACCRUAL MECHANISM

The GlobusChain project combines aspects of a traditional business model with a value accrual mechanism centered around the native digital asset, GLSC Token. This hybrid approach allows the platform to generate revenue through traditional channels while also providing value to the native token, which benefits token holders and the ecosystem as a whole.

## CASHFLOW CHANNELS

### GLSC TOKEN

The native token will be used for platform transactions, such as fees, rewards, and staking. It will also serve as a governance token, enabling holders to participate in decision-making processes.

## STABLECOIN

A stablecoin pegged to a fiat currency (e.g., USD) will provide users with a stable store of value for transactions within the platform. This will help mitigate volatility risks associated with cryptocurrencies.

## TRADITIONAL CURRENCIES (FIAT)

The platform will also support fiat currencies for transactions, allowing users to seamlessly interact with both Web2 and Web3 services

# THE PLATFORM WILL CHARGE FEES FOR VARIOUS TRANSACTIONS AND SERVICES, SUCH AS:-

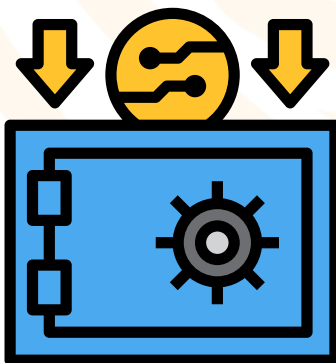

## LIQUIDITY FEES:

Users providing liquidity to decentralized exchanges or other DeFi services may be charged a fee.

## GAS FEES:

Users will be charged gas fees for transactions on the blockchain.

## STAKING &

## TREASURY FEES

Fees may be levied for participating in staking, yield farming, or other DeFi services.

## PLATFORM SERVICE FEES

Fees may be charged for using certain platform services, such as e-commerce or gaming.

# **VALUE ACCRUAL TIMELINE AND REWARD STRUCTURE:**

The value accrual mechanism will be implemented in stages, with rewards and incentives designed to encourage user adoption and ecosystem growth. Early adopters and active users may receive higher rewards initially, with rewards gradually decreasing over time as the platform matures and user base expands.

## **TOKEN VALUATION FRAMEWORK:-**

A token valuation framework will be established, outlining the distribution of funds between the entity owning the token and the dividends or rewards accruable to investors. This will provide transparency and clarity on the value of the native token and its potential returns for investors.

By combining traditional business models with a value accrual mechanism focused on the native digital asset, the GlobusChain project aims to create a sustainable and thriving ecosystem that benefits both the platform and its users.

optimal value accrual mechanism involves balancing the interests of various stakeholders, such as users, investors, and the platform itself. Here's a potential breakdown of value distribution in percentages, aiming to attract more users and investors:

## **1. TRANSACTION FEES:**

- Platform: 70%
- Token holders (through staking or governance participation): 30%

## **2. STAKING REWARDS (ANNUAL PERCENTAGE YIELD):**

- High APY for early adopters: 25% (during the first year)
- A gradual reduction in APY: 20% (second year), 15% (third year), and 10% (fourth year onwards)

### **3. INCENTIVES AND BONUSES:**

- User referral program: 5% bonus in tokens for each successful referral
- Platform usage rewards: 2% cashback in tokens for using platform services (e.g., e-commerce, gaming)

### **4. GOVERNANCE REWARDS:**

- Token holders participating in governance decisions: 1% annual reward in tokens

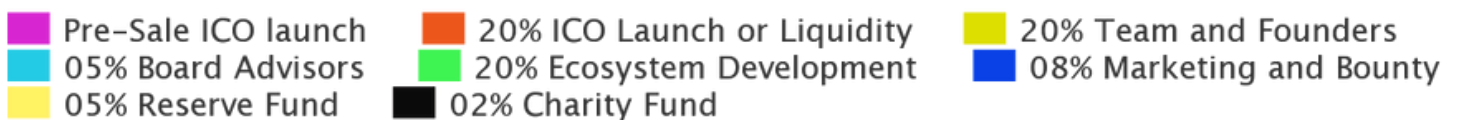

### **5. ECOSYSTEM GROWTH AND DEVELOPMENT FUND:**

- We will allocate 10% of the platform's revenue to support new projects, partnerships, and marketing initiatives

# TOKENOMICS

- 20% Pre-Sale ICO launch
- 20% ICO Launch or Liquidity
- 20% Team and Founders
- 05% Board Advisors
- 20% Ecosystem Development
- 08% Marketing and Bounty
- 05% Reserve Fund
- 02% Charity Fund

# FUNDS ALLOCATION

- 40% Engineering and Development
- 12% Business Development
- 20% Marketing and Promotion
- 10% Legal and Regulation
- 08% Operational and Administration
- 04% Contingency
- 06% Partners

# DISCLAIMER

Please read the following carefully.

Below applies to everyone who reads this white paper. The GLOBUS White Paper (hereinafter referred to as the "White Paper") is prepared and provided on the basis at the time of its preparation, so any content contained in the White Paper may be changed or updated at any time at the discretion of [Coin Issuer or Business Progress Name] (hereinafter referred to as "Company").

If you have any doubt on the content of this White Paper, you should consult with your accountant, attorney or other expert prior to purchasing the company - issued Globus Smart Coin (hereinafter referred to as "Globus Smart Coin").

1. The purpose of this white paper is to address summarized information and introductions about the GLOBUS platform the company is preparing. This white paper is not legally binding on the GLOBUS platform or company and does not have the nature of subscription, purchase, investment offers and investment enforcement.

2. All information or analysis in this white paper cannot be the basis for investment decisions and in no way constitutes investment proposal or advice. I would like to inform you that any future-planned content or data in this White Paper may be changed for any reason.

3. Companies, including directors, agents, employees, contractors, and sales partners, are not liable for all kinds of damages that may occur directly or indirectly in accordance with the information contained in this document: (1) accuracy and completeness of the contract; (2) white paper error or omission; (4) White paper unavailable. In addition, a company shall not be held solely responsible for any of the following consequences of a decision-making action using the information contained in this document: (1) revenue, revenue, liabilities and all other forms of financial damage.

4. The content of the White Paper may vary depending on the ongoing GLOBUS platform, market changes, technological advances, and changes in ICO or token regulations. However, we inform you that the Company is not obliged to notify or report future events, platforms, future plans, changes in estimates or changes within the margin of error, etc. set forth in this White Paper.

5. Information on areas such as law, tax, regulation, finance, and accounting in this white paper is not advice. Purchases of Globus Smart Coins can result in material losses, including material assets paid to buyers to purchase Globus Smart Coins. Prior to purchasing Globus Smart Coins, buyers are encouraged to consult experts in taxation, regulation, finance, and law about potential risks, revenues, and possible consequences of Globus Smart Coin trading.

6. It is entirely up to the buyer of Globus Smart Coins to determine the legal availability of overseas exchange and disposal of other tasks, such as income taxes, within his legal jurisdiction.

7. The publication and distribution of white papers is prohibited in countries where the publication and distribution of white papers is prohibited. The information in this White Paper has not been verified or authorized by any regulator, and any act against the law shall not be effective to the Company. We do not guarantee that the publication and distribution of this White Paper complies with all the regulations of the country in which it was issued.

8. All White Paper content is protected by copyright. Individual sections of the White Paper may be downloaded or printed only for personal use or other ownership disclaimers. This White Paper shall not be reproduced in whole or in part, by electronic means or other means, or amended, linked or used for public or commercial purposes without prior written permission from the Company.

Investment risk companies are notifying buyers of various types of risks, including the risk of losing money worth purchasing Globus Smart Coins. The accuracy of the information about risk or uncertainty written below is not guaranteed. The company does not guarantee the value of Globus Smart Coins. Buyers are considered to have agreed to recognize and purchase the risk as it is, with no warranty of any form of Globus Smart Coin as it is, as the sale and possession of Globus Smart Coins.

1. Blockchain risk: Blockchain system congestion can cause transactions to be processed late or invalidated. Smart contracts in charge of issuing and distributing Globus Smart Coins are based on Binance Smart Chain technology. Binance Smart Chain may have weaknesses and vulnerabilities and may cause various bugs, including bugs in which Globus Smart Coins are lost. These Binance Smart Chain problems can also cause material damage to the company and Globus Smart Coin buyers.

2. Personal information risk: User's personal information is required for the distribution and control of Globus Smart Coins in the electronic wallet of the Globus Smart Coin buyer. Therefore, if personal information is leaked, Globus Smart Coins in the buyer's electronic wallet can be leaked. Moreover, due to the buyer's personal information leakage, a third party may access the buyer's electronic wallet and steal GLOBUS coins.

3. Security risks: Like all cryptocurrencies, they are vulnerable to malicious attacks such as Ethereum 'double payment attacks' or '51% attacks'. Hackers or other malicious groups can attack the company or Globus Smart Coin with the above attack method, and successful blockchain attacks can deal with Globus Smart Coin transactions and Globus Smart Coins.

4. Electronic wallet compatibility risk: To purchase or store Globus Smart Coins, you must use an electronic wallet that is technically compatible with Globus Smart Coins. If you use a different wallet, you may not be able to access the Globus Smart Coin you purchased.

5. Inevitable risk: GLOBUS platform is still under development and the company will try to develop and maintain GLOBUS platform as stated in the white paper, but changes can occur for a variety of reasons, including legal, design, technology, and administrative regulations. Companies are exempt from liability for damages to value, loss and liquidity of Globus Smart Coins due to force outside of the Company's

control such as factors in regulatory frames, changes in licensing and taxation policies, the emergence of platforms or open sources, lack of market interest, and other similar events.

6. Risks of change in value: the company does not guarantee the value of Globus Smart Coins. The company may take relevant measures, such as changes in the value of Globus Smart Coins, incineration, and so on, due to management or platform operational reasons. The company will be exempt from any damages caused by changes in the value of Globus Smart Coins.
